NQ Largest Current **EXCEL DESIGN EXPERT SCOTT CORWIN FIVERR**

As of July 21st 100% of the stocks were above their QPivots and had positive WK_DTS readings. As of Friday's close, only 75% are above the QPivot with 50% showing positive WK_DTS. Two stocks, AVBO and NVDA turned negative, as they were down 5.9% and 3% respectively. Only three, AMZN, META, and GOOGL, are still positive based on the 3DTS.

Jerry A and his research group including **Excel Pro Scott Corwin** have completed a similar analysis on all eleven sectors and their largest holdings. Some sectors are starting to look more interesting but of course in addition I look at the RS analysis on each of the sectors.
